

# 954

## Shockless Ionising Gun

The Meech Model 954 is a hand-held ionising air gun for neutralising static charge and removing dust contamination in a wide range of industrial processes.

The ergonomic, lightweight design of the 954 provides simple, quiet and effective operation.

The 954 is powered directly from the Model 904 (refer to separate datasheet) and requires a clean, dry compressed air supply.

954/05/EN/-11/09

### Technical Characteristics

Weight	Approx. 0.3kgs
Construction	Cast metal gun handle. Ionisation nozzle is machined aluminium with polymer internal parts.
Maximum operating temperature	85°C
HT Cable	3m supplied as standard. Longer lengths can be specified at time of ordering
Ionisation supply	7kV from 904 power unit
Air pipe connection	¼ inch BSP "snap on"
Maximum air pressure	7 bar (normally used at 2 bar)

### Feature

### Benefit

Resistively coupled emitter pin	Shockless, thereby enhancing operator safety
Nozzle outlet aperture designed to increase air velocity	More effective ionisation performance, reduced noise levels
Integral bypass holes	Meets dead end pressure safety guidelines
Easy Maintenance	Optimum performance and equipment life
Ergonomic design	Comfortable for repetitive use

Product shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit [www.meech.com](http://www.meech.com).
