

Transfer of material

Energy Saving Air Amplifiers

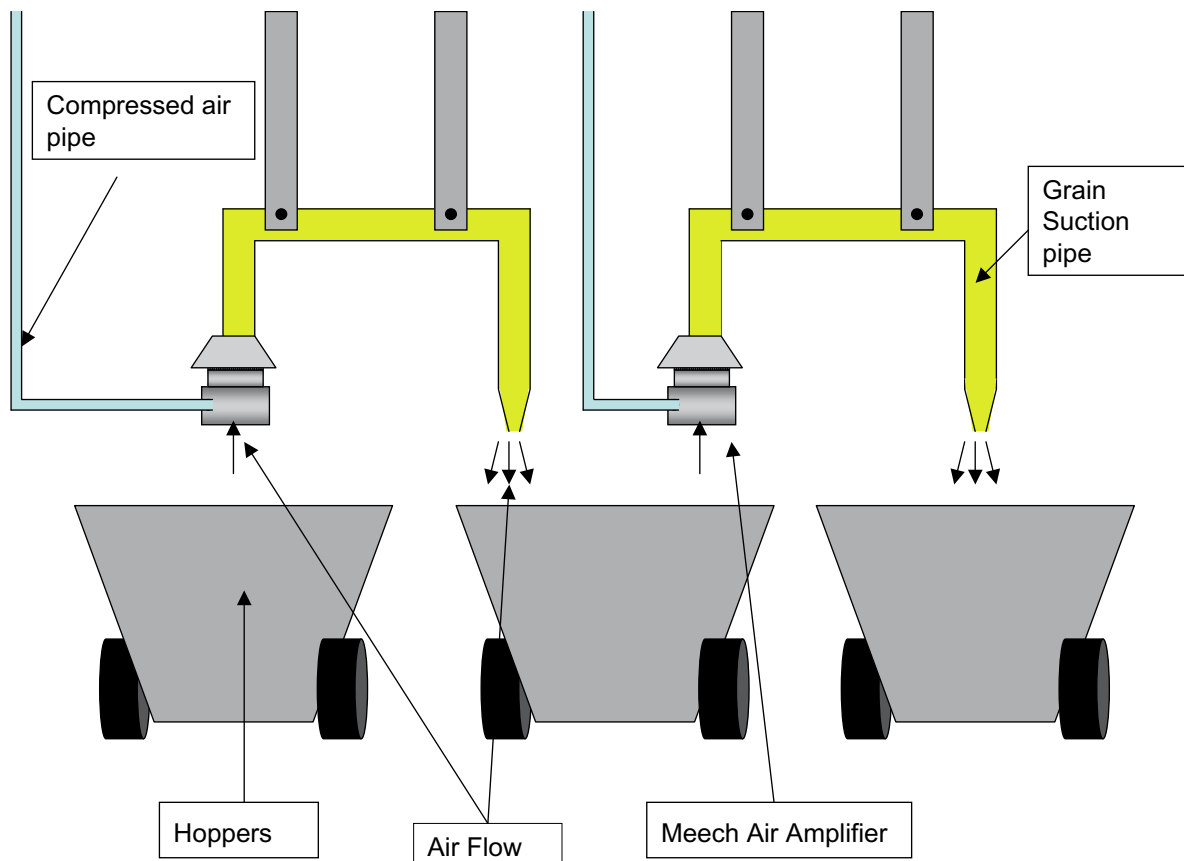

MAT - Energy Saving Air Amplifiers

- Transfer of material -

ISSUE 1/EN-01/10

Application/ Problem

Meech Air Amplifiers have the ability to both suck and blow. This makes them the ideal tool to use in the transfer of material.

Example/Solution

A company wanted to find a cost effective way of moving plastic granules from one hopper to another. Air Amplifiers connected in tandem provided an efficient, space saving and economic solution. Air Amplifiers have also been used to transfer chips, sawdust, paper, cloth trim, grain, dust, capsules and powder.

Products shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
