Energy Saving Air Amplifiers

MAT - Energy Saving Air Amplifiers -
Blowing/ Sucking - ISSUE 1/EN-1/10

Application/ Problem

Meech Air Amplifiers have many different industrial uses. Two common ones are cleaning down or hovering up material.

Example/Solution

A print manufacturer is cutting printed material to size; small shavings cling to the cut edge. If these are not removed they can cause blockages in the machine. Additional problem occur when dust builds up on the machine during the cutting process. By installing a Meech Air Amplifier the company were able to hover up the printed materials and then carry them away through ducting. The Air Amplifier has completely eliminated the small shavings and additional dust build up on the machine.

Products shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
