

Blow off/ Blowing 3

Energy Saving High Thrust Jet

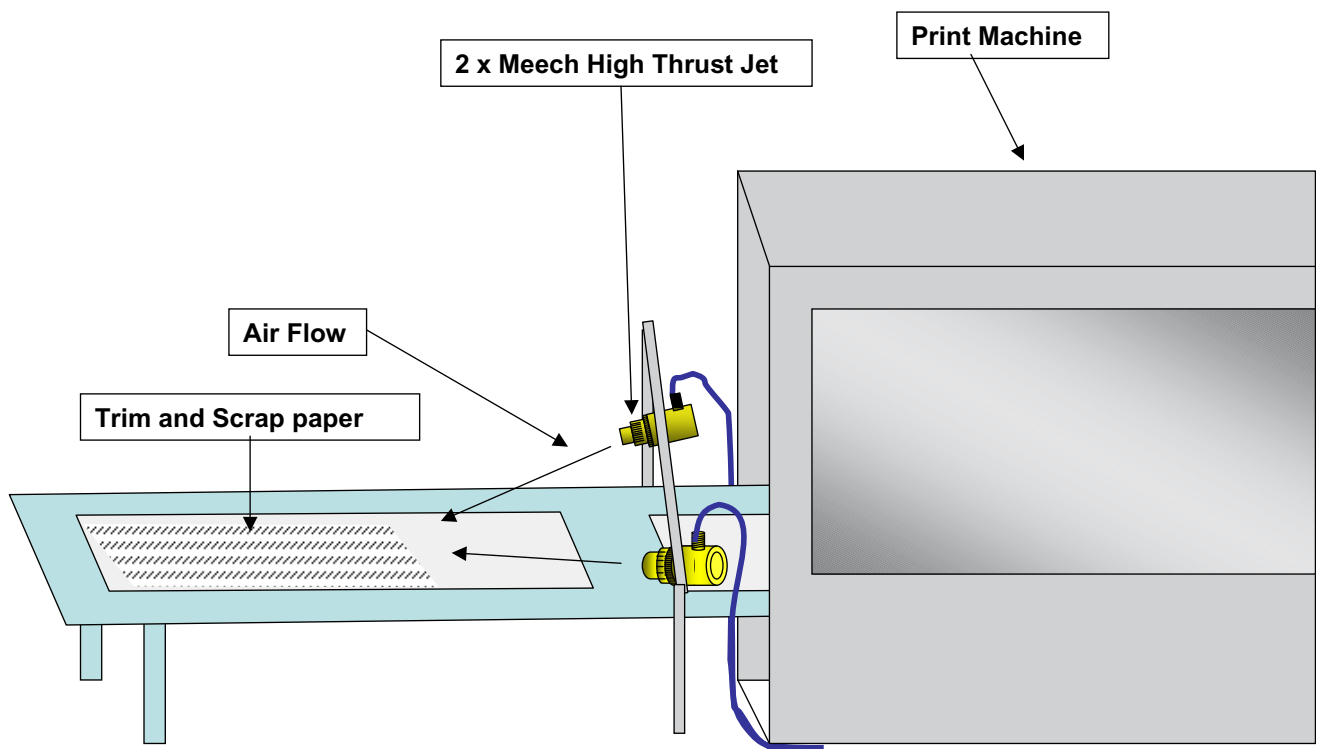

MAT - Energy Saving High Thrust Jet

- Blow off/ Blowing 3 -

ISSUE 1/EN-01/10

Application/ Problem

High Thrust Jets can produce an actuate column of air. This concentrated column of air allows small items to be sucked or blown away.

Example/Solution

A paper printing company uses High Thrust Jets to blow-off of small pieces of trim and scrap paper from the machining process. The burst of air the High thrust jet produces is ideal for blowing the small pieces from the machine.

Products shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
