

# Drying 1

## Air Curtains

MAT - Air Curtains - Drying 1 -

ISSUE 1/EN-01/10

### Application/ Problem

By mounting Air Curtains towards the neck of a bottle you can blow water away from the top to the bottom. By angling the Air Curtains in this manner can giving a sliding effect of air which is extremely effective in drying the bottle.

### Example/Solution

A major American brewer used 2 angled air curtains to dry/blow the water from bottles before the label application. Using Air Curtains resulted in better product quality and less rejects.
